There's No Room for Error

Protecting the integrity of valuable, temperature sensitive payloads

SAFETY ISN'T NEGOTIABLE

Patients around the world rely on you to provide the treatments and therapies they need to thrive. A temperature excursion on the way to a clinical site can be costly for you. But for a patient, treatment delays can prove risky. Peli BioThermal's temperature controlled packaging solutions meet the needs of the most challenging transportation situations with the most reliable, longest temperature control duration on the market.

WHEN PATIENTS COUNT ON YOU, COUNT ON US

Companies across the world trust us to protect their most delicate pharmaceutical products. Peli BioThermal's full range of temperature controlled packaging eliminates hot and cold spots, locking in the ideal temperature range for up to 120 hours. Whether shipping a parcel or bulk products, our solutions meet your performance requirements and offer the lowest overall cost with industry leading payload to external volume ratios.

Sustainability

Rent. Reuse. Recycle. We're on a journey to protect our environment and our planet one package at a time.

Innovation

Our team thrives in the area between problem and solutions to develop cold chain packaging innovation.

Reliability

Our customers trust us with their most valuable, health-giving and life-saving products.

THERMAL PACKAGING TECHNOLOGIES ON A GLOBAL SCALE

Peli BioThermal's innovative single-use and reusable thermal packaging products are used by leading global life science industry companies and organizations in pharmaceuticals, biotech, laboratory, diagnostics, and military/government sectors to protect and safely transport their most critical temperature-sensitive tissues, biologics, diagnostic, devices and vaccines. We offer the most diverse and trusted selection of cold chain packaging solutions, worldwide manufacturing and service centers staffed by cold chain engineering experts and provide an easy-to-use, web-based asset management service that allows organizations to track individual shipments from start to finish while setting up automated reminders for key logistics processes.

RELY ON US TO SOLVE YOUR BULK RENTAL CHALLENGES

Our Crêdo™ on Demand is a globally available, high performance, flexible, cost effective cold chain shipping rental program using our passive cold chain containers. Flexible daily and monthly rental rates are standard when picked up from and dropped off at Peli BioThermal locations worldwide.

It's the Journey and the Destination

1
SHIP

- Choose from parcel or pallet shippers
- Payload protection from sub -65 degrees Celsius to ambient room temperature
- Single-use or reusable temperature-controlled solutions
- Flexible bulk rental and leasing programs

2
TRACK

- Crêdo ProEnvision™ software as a service – full traceability and transparency
- Worldwide view of shipper movement and asset management
- Temperature monitoring capabilities
- Audit trail for regulatory compliance

3
SERVICE

- Global network of service centers to support reusable shippers
- Shipper conditioning and refurbishment for reuse

PERFORMANCE YOU CAN DEPEND ON

All Peli BioThermal products are qualified against the highest standards, including the ISTA 7D standard.
